

HS408 Airborne 25x1.2 (30-559)

The new lightweight for wheelchairs.

Do you know Aaron Fotheringham? The 17 year old young man from Las Vegas made the first ever Back-flip - in a wheelchair. We so admired his achievement that we developed this special tire for him. At 30mm the Airborne is wider and more comfortable than a regular wheelchair tire. The additional comfort is not only useful in making a Back-flip landing. Low weight and low rolling resistance provide momentum - for the jump, or for travelling generally. Yet despite its sporty background the Airborne is equally at home in everyday life. For the first time we use the HD Speed Guard in a wheelchair tire and the unique, high-density protection belt offers excellent puncture protection. Now you are ready to take off!
