

Aeroflex 25x1.375 (559)

Highly Durable AERO-FLEX® Polyurethane Flat Free Tires CEW is a leading provider of AERO-FLEX® PU tires featuring exceptional shock absorbing qualities and unsurpassed durability. These micro cellular polyurethane (PU) tires are exclusively designed to provide a cushioned ride, making them ideal for wheelchairs and other applications. The secret is in the structure of the material. Thousands of microscopic, honeycomb-like cells are formed by a matrix of tough urethane elastomer. These tiny cells make CEW's tires lightweight and flexible, allowing them to compress and conform to road obstacles just like air-inflated tires.
