

## GIVE YOUR MOBILITY A BOOST WITH A COMPANION

The power assist device from Cheelcare increases the distance and range of mobility for people who use manual wheelchairs. Designed and manufactured in Canada, Companion's patented technology is compatible with rigid and folding wheelchairs.

### Did you know??

Manual wheelchair users complete 2,000 to 3,000 pushes on average per day (Koontz et al., 2006). That can be over 1 million pushes per year!

A power wheelchair user travels about four times the distance in a day compared to a manual wheelchair user! (Cooper et al., 2004).

Shoulder pain occurs in 37%–84% of the [SCI] population according to studies published over the last decade (Alm et al., 2008; Mulroy et al., 2011).

**Save your shoulders for transfers!**

### QUICK-CONNECT

Our patented mounting hardware securely connects and disconnects your Companion **in less than 10 seconds** without any tools.

### MANEUVERABLE

The Companion features a **tight turning radius** and **powerful motor** to deliver outstanding maneuverability both outdoors and within the home.

### LIGHTWEIGHT

Companion **weighs about 20 lbs (10 kg)**, making it easy to load and unload from your vehicle when you're on the go, and adds as little as 1.5 lbs to your chair when disconnected.

### TRAVEL-FRIENDLY

From sea to sky, and everywhere in between, Companion was designed in compliance with travel industry standards - accompanying you on every part of your journey.

Cheelcare is a team of dedicated engineers, designers, and creatives on a mission to redefine accessible through innovations that move people.
